Experience

Laravel Developer | GMG Software Solutions | Hyderabad, Pakistan | March 2025 – September 2025
- Specialized in backend development using Laravel, ensuring clean, scalable code to optimize performance.
- Collaborated closely with cross-functional teams, integrating RESTful APIs, payment gateways, and third-party services to enhance functionality and provide smooth user experiences.
- Led server deployment, pull requests, code reviews, and unit testing to ensure high-quality deliverables.

Projects

Echo Solar / Exxsun | Tech Stack: Laravel, MySQL, Ajax, JS, jQuery
- Developed a solar monitoring system with real-time dashboards for energy usage, historical data, and performance metrics.
- Integrated payment & billing module with automated invoicing.
- Built an admin panel to manage users, tariffs, installations, and system settings

Lottery App | Tech Stack: Laravel, MySQL, Ajax, JS, jQuery
- Built a dynamic lottery game management system with secure payment integration and real-time monitoring.
- Designed and optimized an intuitive admin dashboard for managing game settings, scheduling, payments, and transactions.

E-Commerce project | Tech Stack: Laravel, MySQL, Ajax, JS
- Designed and developed a fully functional e-commerce platform with product listings, shopping cart, and order management.
- Implemented user authentication, product search, and responsive design for mobile and desktop.

Education

Bs Software Engineering | University of Sindh | 2024 – Present
